

## Thanks for Downloading Our AS3 AERO SHOUTCAST PLAYER

This Flash File Created with FlashCS3.  
Size: 291x196 Pixel – 21KB

**Necessary Fonts:** Before opening FLA source, Install following Font:  
Bavaria Regular Flash Pixel Font  
Download Link: <http://flashjournalism.com/tips/pixelfonts.htm>

### About This Flash:

This is a Fully Dynamic Compact Radio Player with special design and functionality.  
The player feeds itself with a XML file and grabs the Song Title from shout cast radio server Live and shows it on Radio Panel with Ticker effect.

### What's new in this Player?

- AS3 version
- Special aéro design with Real Audio Spectrum
- Fully XML Dynamic Labels
- XML Dynamic Colour for Player Elements
- Modified Song History List
- Dynamic Radio Station Name
- Refreshing the Player automatic if **USED MEMORY** becomes bigger then 70MB
- Download source includes five separate folder as:
  - Original, Includes the Player with main Concept behaviour
  - autoPanelOpen, Player will open Panel Automatic
  - autoallOpen, Player will open Panel and SongHistory Automatic
  - withoutAutoStart, Player without AutoStart
  - LoadSample, this shows how load the Player into a new Flash Template

### How we use This Player?

To prepare Your Own Player, you should do following process:

In radio.xml:

- StationName="YOUR STATION NAME"
- Label1="CLICK TO PLAY!"
- Label2="PLEASE WAIT ..."
- SpectrumColour="0xCCFF00"
- PlayerButtonsColour="0x111111"
- SongTitleColour="0xCCFF00"
- SongHistoryTimeColour="#CCFF00"
- url="YOUR RADIO URL WITHOUT HTTP"      like: 91.121.8.6
- port="YOUR RADIO PORT"                      like: 80

**Note:** SpectrumColour and SongHistoryTimeColour have **two different colour setting**.

**Important:** Don't enter "**Http://**" or port separator sign "**:"**" into xml, flash does this automatic.

Thanks for Downloading this File, Good Luck using the file in your projects!
