

## Thanks for Downloading Our AS3 Weather Widget

This Flash File Created & Published under FlashCS3.

### Necessary Free Fonts for this Project:

- Marke Eigenbau > <http://pixelfonts.style-force.net/>
- Swis721 LtCn BT > <http://www.font-cat.com/font-en-8677.html>

**Install necessary Fonts before opening FLA source files to prevent any Font issues.**

### What about Flash action script comments?

We wrote comments on most lines of this Form script to help you for a better Form Function Tracking.

### What's about this Widget?

- A AS3 Compact weather widgets powered with Yahoo Weather Service
- Widget shows your city Weather for Today & Tomorrow with a smooth & stylish design
- It can be easily implemented to each new Flash Template
- Widget refresh itself on every 10 seconds to show the last weather changes
- It's fully XML driven, widget colours can be customized completely in XML file

### How set my City Weather on this?

First you should know your city Yahoo Weather API code, after this open setting.xml and just paste your code there like: city="GMXX0028"

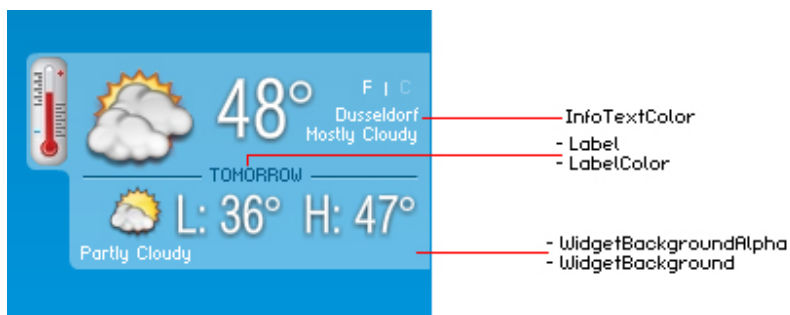

### How find my City Code?

As we use Yahoo Weather service on this widget, to find your city weather code:

1. Go to <http://www.yahoo.com/>
2. Select Weather option from Left Menu
3. Enter your city name and click Go
4. Now in right side of your City Weather page, click on RSS (Orange Rectangle)
5. Check your Browser Address bar to find the API code, for example:

**<http://weather.yahooapis.com/forecastrss?p=GMXX0028&u=f>**

### Setting XML description:

<Item

```
city="GMXX0028"
autoHilde="no" > Set this to "yes" or "no"
Label="TOMORROW"
LabelColor="0x000000"
WidgetBackground="0xFFFFFFFF"
WidgetBackgroundAlpha="0.4"
InfoTextColor="0xFFFFFFFF"/>
```
