- Devshed PHP Shoutcast Class

NH CASTPLAYER Highlights:

- Responsive Design
- Support Shoutcast V1.0, V2.0 and Icecast V2.0
- Dynamic Admin Panel for editing Radio Stations
- Support MPEG, ACC stream format under Desktop, Android and IOS
- Support Special characters on Song Title

Main Installation & Settings:

1. Customize player settings under js/settings.js

```
var playerWidth = 450;
var playerHeight = 510;
var ShowAlbumCover = true; // For t
var AutoPlay = true;
var radioStations = true; // true:
var playerPosition = "TR"; // Top-L
var playerGlowColor = "#3a88cb";   /
var playerSkinColor = "#323232";
var playerAnimatedSkin = true;
var playerMini = false;
```

2. upload player files and folders under your server with **WRITE PERMISSION**.
3. Call www.yourserver.com/playerFolder/admin.php
   This page must be Password Protect, you can set your loggings inside
   password_protect.php

```
// Add login/password pairs below, like described above
// NOTE: all rows except last must have comma "," at the end of line
$LOGIN_INFORMATION = array(
  'admin' => 'ADMIN PASSWORD FOR PLAYER'
);
```
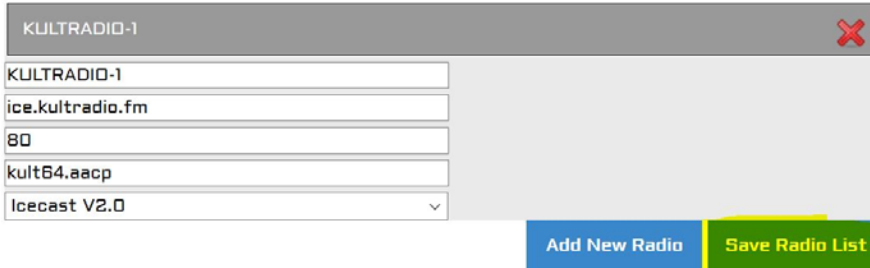

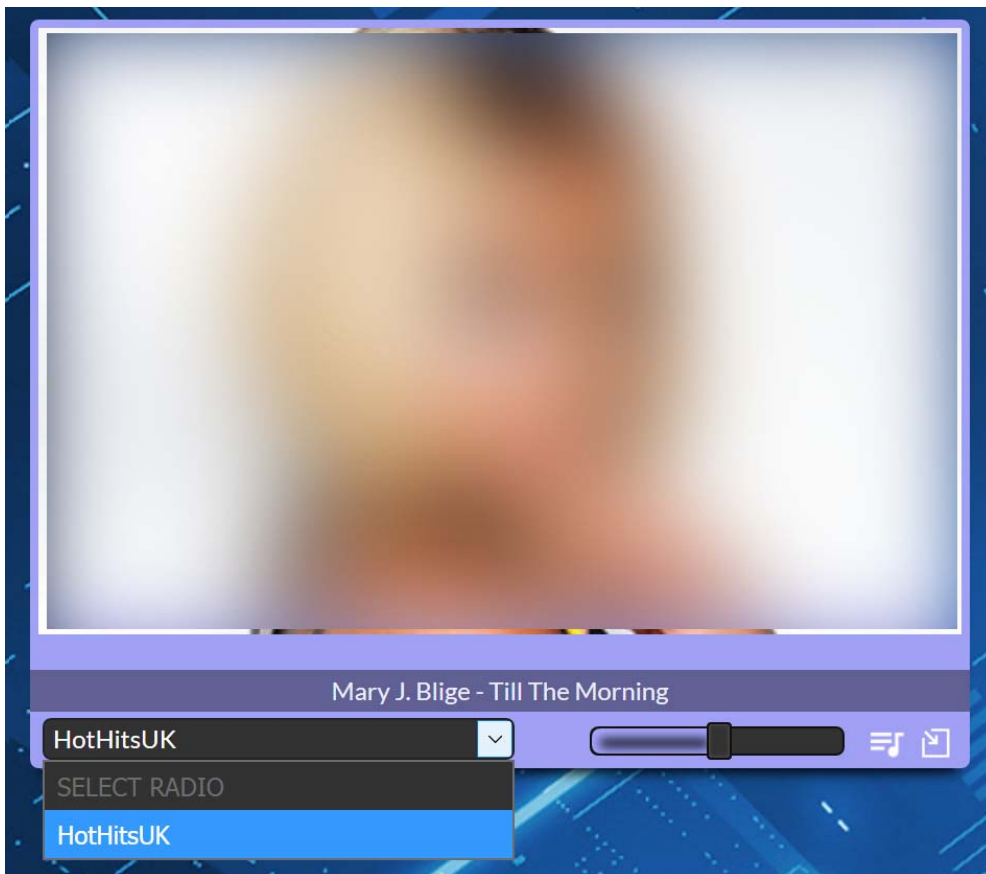

4. Admin Panel First Time:

```
Radio Name
Radio URL
Radio PORT
Radio Mount
SELECT RADIO TYPE

            Add New Radio    Save Radio List
```

5. Try add a new Station:

KULTRADIO-1
ice.kultradio.fm
80
kult64.aacp
Icecast V2.0

Add New Radio   **Save Radio List**

6. After adding you need to save it:

KULTRADIO-1	✖

KULTRADIO-1
ice.kultradio.fm
80
kult64.aacp
Icecast V2.0

Add New Radio   **Save Radio List**

7. Check saved Radio under player:

Mary J. Blige - Till The Morning

HotHitsUK

SELECT RADIO

HotHitsUK

8. Add/Delete/Sort(with Drag) more Stations:

9. Check Final result under player:

LastFM AlbumCover API KEY Setting:

1. Create a API-Key under: http://www.last.fm/de/api
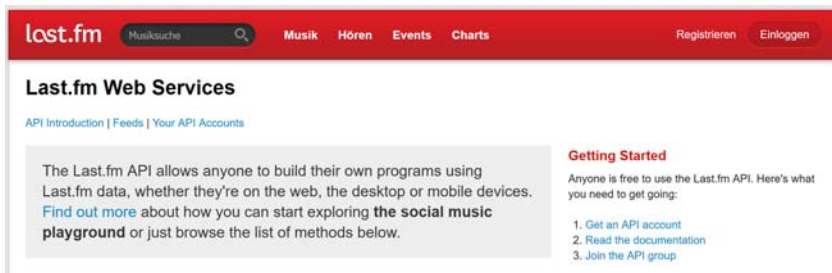

2. Set your KEY under player file: fm_api_key.php

```php
<?php
    $API_KEY = 'ENTEY YOUR LASTFM API KEY HERE';
?>
```
