

Thanks for Downloading Our Flash SCROLL MENU [Classic - Pro]

This Flash File Created with Flash8 – Published under Flash8.
Size: 10KB

Public Notes

- We have used **Tahoma** as System Standard Font in this Project, if you want to use another Font, you should **import** and **embed** this for your text fields.
- We have prepared separate Sources [Fla - XML] for each Menu.

About this File:

- Flash Scroll Menu is a Powerful Dynamic Menu that can easily customized for your Projects
- There is two different type for this as **Long** and **Short**, for each one you have separate sources
- You can add **unlimited** items on this menu just by adding them in **XML** file, the menu Buttons can load **external** files like **swf**, **image**, **url address** or **html texts**.

What about XML setting?

We made this as easy as possible for users, here you will find a sample of feed XML to show you this fact:

```
<Item name="URL FLASHDEN.NET" url="http://www.flashden.net"/>
<Item name="LOCAL SWF" swf="swf/sample.swf"/>
<Item name="URL AUDIO JUNGLE.NET" url="http://audiojungle.net"/>
<Item name="LOCAL IMAGE" image="images/SampleImage.jpg"/>
<Item name="LOCAL HTML TEXT">
  <details>
    <![CDATA[... YOUR TEXT WITH HTML STYLE ...]]>
  </details>
</Item>
```

As you see, you should just define the file Type and value in XML, the rest of process will be done inside Flash.

In **Pro Menu**, you can also set a **thumb Image** on each node that will be shown on each menu Button.

What about Menu design Setting?

Scroll Menu design can also be set via setting.xml file, this includes Menu Frame Colour; Buttons Label and Text Colours, as follows:

```
<ButtonNormal>0077B0</ButtonNormal>
<ButtonRollOver>004566</ButtonRollOver>
<TextNormal>FFFFFF</TextNormal>
<TextRollOver>9DDFFF</TextRollOver>
<MainFrame>FFFFFF</MainFrame>
```

For a better usage, you will find for each Menu [Long & Short], a separate source files in Project root. If you need more help, contact us: support@nhstudio.de

Thanks for Downloading this File, Good Luck using the file in your projects!
