

## Thanks for Downloading Our Flash XML Template

This Flash File Created with Flash8 – Published under Flash8.  
Size: 147KB

### Font:

**Note:** All necessary Fonts also exist in **Font folder** on Project Root.

### About This Flash:

Flash XML Template created with Flash8 and powered with XML, PHP and PAYPAL Cart.  
All session contents are dynamic and initialize with xml files.  
You can update each session content very easy, just by updating the external XML files!

### Template details:

- Home
- About Us
- XML Paypal Shop with Login system
- XML Photo Gallery with Category
- XML Movie Gallery with Category
- XML News
- Links
- PHP Contact Form
- XML MP3 Player

## How we customize this Template?

### Website Name:

To add your Site name just open sitename.xml and enter your website name.  
This will change the Site name, it's reflection effect Text and also site name on header of Template.  
Sample Content Images will be find in images>[sample001.jpg](#) for home or [Sample002.jpg](#) for about us

### Main Menu on Header:

This menu feed from mainmenu.xml, if you want to reposition or remove a session from Template, do this here, and also do the necessary change on  
::: MainMenu ::: in Flash Library in actions layer lines **18-24**

### Setting the Add To Favourite Button:

Please refer to Flash Library:

::: MainMenu ::: > favouriteButton Layer, there you will find the Button action:  
`getURL("javascript:window.external.AddFavorite('http://www.flashden.net/', 'Flashden Flash Stock');");`  
Just replace your website url and Title.

### Home and about us:

As you see the Home and About us session contents (Texts and Photos) come direct from mainmenu.xml.

### Shop Login system setting:

### Important: you should test the project on localhost

For local testing:

#### Localhost:

- 1 Make a database and name it RegForm

- 2 Go to your database and import **member.sql** from SQL folder to create the **member** table under your database.
- 3 Open **register.php** and **newlogin.php** and replace following variable for connecting to your localhost:
  - Your username
  - Your password
- 4 After doing this go to your database and import **member.sql** from SQL folder to create the **member** table under your database.

For Online Version:

**Your host:**

- 5 Open **register.php** and **newlogin.php** and replace following variable for connecting to your host database:
  - Your host name
  - Your username
  - Your password
  - Your database name
- 6 After doing this go to your database and import **member.sql** from SQL folder to create the **member** table under your database.

Now you can test the Flash Template, just by registering yourself and login in Shop!

**Shop Session setting:**

We have used our optimal version of our Flash Pay Pal shops for this Template.

**\*Important Note1:** If you look at our Project files, you will find all xml files in xml folder except one! products.xml feeds our shop and should be in **root of project**, don't remove this into xml folder or somewhere else.

**\*Important Note2:** Shop **Pay PAL Account** and Shop **Currency** come from first node of xml file, be careful by updating this node.

```
paypalemail="youremail@yourdomain.com" paypalcurrency="USD"
```

You can update Product properties like Description Text, Price and Photos in this xml file.  
Product Photos will be find in images>shop folder

**Photo Gallery:**

Our Photo Gallery has Maximum 6 main category feed from **PhotoGalleries.xml**, add and remove the category here.

Each category can handle unlimited photos.

The whole structure of Gallery is like this:

PhotoGalleries.xml call following **xml/PhotoGallery** according to selected category

- 1 Gallery1.xml
- 2 Gallery2.xml
- 3 Gallery3.xml
- 4 Gallery4.xml
- 5 Gallery5.xml

## 6 Gallery6.xml

For replacing the photos please refer to images> PhotoGallery  
There you will find separate folder for each category with thumb and zoom photos.

### **Movie Gallery:**

Our Movie Gallery has Maximum 6 main category feed from [PhotoGalleries.xml](#), add and remove the category here.

Each category can handle unlimited Movies.

The whole structure of Gallery is like this:

MovieGalleries.xml call following xml from [xml/MovieGallery](#) Folder according to selected category

- 7 Gallery1.xml
- 8 Gallery2.xml
- 9 Gallery3.xml
- 10 Gallery4.xml
- 11 Gallery5.xml
- 12 Gallery6.xml

For replacing the movies please refer to movies Folder  
There you will find separate folder for each category with thumb folder of movies.

**Question:** Preparing thumb of FLV first frame is boring me, is there a solution to do this automatically?

**Answer:** Honestly we have the solution on hand, put just FLV movies in each Gallery folder and flash created the thumb menu of FLV first frame. This work perfect local but after uploading this we had many problem by loading the thumbs, especially when you use a big size movie. Because of this we have decided to use the hand made thumb in Template and bring the user a better and saver result.

**Note:** If you need this Auto thumbs Gallery, then drop us an email with your purchased file source, we will send it to you for free, then you can Test and judge it your self 😊

### **News session:**

For adding the news, just open news.xml and enter your news with text, photos or Movies!

News list feed itself from [xml/news.xml](#)

News Images will be find in [Images>news](#)

**Question:** Can I really add Flash or Movies to my news session?

**Answer:** Yes, we have used text filed with html style in all session of this Template that means you can Show almost everything on this session by putting the source in xml file.

### **How Set Flash or FLV Movie onto your news:**

Just consider to add an image, but like this:

```
</img>
```

For adding FLV movie, you need to export this as a swf and follow the above method.

### **Links session:**

This can be also a List of your Clients with their Logos and Reference Links

As I have mentioned before, we use html style for our dynamic text fields and this allow user to load almost everything on to flash.

For adding your news Links and URL, please refer to [xml/links.xml](#)

**Note:** The Body Logo belongs to Template and comes from Flash,

If you want to replace this, you will find it in Flash Library ::: [LinkBodyLogoMC](#) :::

**PHP Contact Us Form with Auto responder:**

To setting up this Form, just do following:

- 1 Open email.php from project root, and enter your [admin email address](#)
- 2 Update the respond message at [AnswerText.txt](#)

**MP3 Player Setting:**

Update your Music list on [xml/songList.xml](#)

Put you mp3s on project root, music Folder

**Graphic source of Template:**

We put all available Photo sources in PSD folder.
