

Adding your new Motive to the list?

For doing this, you should first prepare your motive and it's available colours:

- Open Photoshop, make a new file in 180x160
- Put your Motive there, like

- Make a new folder (for example hiphop) under motives folder and save your motive there in PNG24 format with name **default.png**
- Make a black colour of your motive and save it as mask with name **hiphop_mask.jpg**

- Make a new colour of your motive and save it with that colour name, like **blue.jpg**

- You can add till 8 Colours on each motive

After this, you should set the new Motives info inside motives.xml to set it for shop, for Hiphop it will be something like:

```
<Item name="HipHop" thumb="images/motives/hiphop/default.png" mask="images/motives/hiphop/hiphop_mask.jpg" price="8.00">
  <color code="0x71ca0d" name="Green" motive="images/motives/hiphop/green.jpg"/>
  <color code="0x23ceff" name="Blue" motive="images/motives/hiphop/blue.jpg"/>
  <color code="0xcd11c7" name="Pink" motive="images/motives/metall/pink.png"/>
</Item>
```

After this you can see this Motive in Shop motives List.
