

## Flash XML Shop Pro | General Help Instructions:

### About XML Shop Pro:

This Flash File Created with Flash8 – AS2.  
Size: 800x600 – 103KB

XML SHOP PRO is a powerful dynamic shop, you can easily change all shop contents, element Colours, Buttons and Texts via XML file.

This is a Flash XML Shop with PayPal & Bank Account Payment options, this shop includes four different modules on XML product setting that cover almost every type of product, but what they are?

- Products Type A or **PTA**, for Products with different Colours, sizes and prices
- Products Type B or **PTB**, for products with different Colours
- Products Type C or **PTC**, for products with different Sizes
- Universal Products or **UP**, for simple products without any options to choose

### What's new in this Shop?

- We have a Category on products with special design, each category can be set with different shop module [PTA, PTB, PTC and also UP], as you see with XML SHOP PRO, you be able to sell a wide range of products in your shop.
- Shop Elements Colours are fully dynamic and can be update via XML file [[shop\\_colour\\_setting.xml](#)]
- New Shopping Cart with more attractive options
- Modifying the Cart functions to work Under Flash8 – AS2 [Our Old cart needs Flash6 – AS2]\*
- Complete New Design for Product Category, Products Menu and many more ...
- PHP Order Form with dynamic Terms and Condition Text [This needs a **PHP4** on your server]

\* If you need this Update on our other Shops, please contact support, you will receive this for free.

### Shop Customizing:

#### How can I update the shop Logo?

Shop Logo is a dynamic image and will be found in project root>images, just prepare your Logo and replace it.

**Note:** The PSD file of Logo is available in project root>PSD, using this brings you a faster and better result

#### How can I set my Shop Products Category?

Shop Products Category comes from **MainCategoryMenu.xml** as follow:

```
<content>
<Item thumb="images/PTA.jpg" name="PRODUCT TYPE A"           ProductType="PTA" feed="xml/PTA.xml"/>
<Item thumb="images/PTB.jpg" name="PRODUCT TYPE B"           ProductType="PTB" feed="xml/PTB.xml"/>
<Item thumb="images/PTC.jpg" name="PRODUCT TYPE C"           ProductType="PTC" feed="xml/PTC.xml"/>
<Item thumb="images/UP.jpg" name="UNIVERSAL PRODUCT" ProductType="UP" feed="xml/UP.xml"/>
</content>
```

- **Thumb** is small image on Category menu Buttons, this can be replace with your new one but should be in same size.

- **Name** is the Category name that will be show in Shop Navigation after selecting this.
- **ProductType** is the type of products, you can easily find out which type pass to your products.
- **Feed** is each category feed XML.

**Note:** we have used similar naming on XML files and their Types for easy tracking, however they can be changed like:

```
<content>
<Item thumb="images/PTA.jpg" name="PRODUCT TYPE A"           ProductType="PTA" feed="xml/Tshirts.xml"/>
<Item thumb="images/PTB.jpg" name="PRODUCT TYPE B"           ProductType="PTB" feed="xml/CoffeeCups.xml"/>
<Item thumb="images/PTC.jpg" name="PRODUCT TYPE C"           ProductType="PTC" feed="xml/Jeans.xml"/>
<Item thumb="images/UP.jpg" name="UNIVERSAL PRODUCT" ProductType="UP" feed="xml/Cameras.xml"/>
<Item thumb="images/UP.jpg" name="UNIVERSAL PRODUCT" ProductType="UP" feed="xml/Watches.xml"/>
</content>
```

### How can I set my Shop Products Menu?

For each Products Menu, there is a separate XML file inside XML folder, and their setting depends to Product Type.

For each Product type, we have prepared a separate instruction that will be found in [Helps](#) Folder.

- [PTA\\_ProductSetting.pdf](#)
- [PTB\\_ProductSetting.pdf](#)
- [PTC\\_ProductSetting.pdf](#)
- [UP\\_ProductSetting.pdf](#)

### How can I set my PayPal Account?

Open [payment.xml](#) from project root:

```
<content>
<Item ShopCurrency="USD" CurrencySign="$" PayPalaccount="YOUR PAYPAL EMAIL ADDRESS" shipment="10.00" freeshipment="200.00"/>
</content>
```

### How can I set my Shop Currency?

Open [payment.xml](#) from project root:

```
<content>
<Item ShopCurrency="USD" CurrencySign="$" PayPalaccount="YOUR PAYPAL EMAIL ADDRESS" shipment="10.00" freeshipment="200.00"/>
</content>
```

### How can I set my Shipment Price and it's Free Limit\*?

Open [payment.xml](#) from project root:

```
<content>
<Item ShopCurrency="USD" CurrencySign="$" PayPalaccount="YOUR PAYPAL EMAIL ADDRESS" shipment="10.00" freeshipment="200.00"/>
</content>
```

\* If you set freeshipment to \$200.00, it means order with Total price over \$200.00 will be free without shipment price.

### How can I update my Shop Colours, do I Know Flash or need to Open FLA Source?

The answer is NO!

Just open **shop\_colour\_setting.xml** from project root, there you will find for each shop element a Colour ASCII Code:

```
<content>
<Item MenuButtonNormal="333333"/>
<Item MenuButtonRollover="70888F"/>
<Item MenuTextNormal="999999"/>
<Item MenuTextRollover="FFFFFF"/>
<Item MenuMainFrame="4B4B4B"/>
<Item MenuBackground="000000"/>
<Item ShopBackground="323232"/>
<Item ShopCloseButton="70888F"/>
<Item ShopAlertMessages="70888F"/>
<Item DetailBoxBackground="4B4B4B"/>
<Item DetailBoxPhotoBackground="70888F"/>
<Item ShoppingCartBackground="4B4B4B"/>
<Item CartElementBackground="70888F"/>
<Item CartButtonsBackground="70888F"/>
<Item CartButtonsText="FFFFFF"/>
<Item NavigationMenuCategoryText="70888F"/>
<Item NavigationMenuProductText="FFFFFF"/>
<Item ShoppingCartElementBackground="70888F"/>
<Item ShoppingCartBackground="4B4B4B"/>
<Item ShoppingCartThumbPreviewBackground="516266"/>
<Item ShoppingCartShipmentText="FFCC33"/>
<Item OrderFormBackground="323232"/>
<Item OrderFormLabelText="FFFFFF"/>
<Item OrderFormObligatoryText="FF0000"/>
</content>
```

As you see, you have fully control on shop Colours without needs to opening the source.

### How can I set my order Form:

For setting your Order Form and confirmation emails:

Open email.php file from project root in dream weaver or FrontPage,

- At Lines 9 and 68 set your **admin email address**
- At Line 68 enter your shop name, this will be used in confirmation emails
- Update also Lines 54 until 59, this is the content of email that will be sent to Customers after each order.

### How can I set my Shop Terms and Condition Text?

Open [TermsandCondition.xml](#) from project root, the content text is in html format, it means you can figure out with Colours, Links, etc...

### How can I customize my Shop "Thanks Page"?

For this you will find a separate Fla in project root, open this and customize the text.  
The background Colours depends to your Shop Background setting in XML file.

### Which Fonts did you used in this Shop?

They are three Fonts, all of them already embedded inside fla and also exist in project root>[Fonts folder](#)

- **Tahoma PC System Font** [This is system default font]
- **04B\_11.TTF** [Free font available under: <http://www.dafont.com/04b-11.font>]
- **Accidental Presidency.ttf** [Free font available under: <http://www.dafont.com/search.php?psize=m&q=Accidental+Presidency>]
-
